# Piotr Gankiewicz

http://piotrgankiewicz.com
www.linkedin.com/in/piotrgankiewicz
piotr.gankiewicz@noordwind.com

Summary

Piotr has over 7 years of experience as Software Developer and Architect and works mostly with C#, .NET, .NET Core and JavaScript technologies and is also a fan of DevOps, DDD, CQRS, Microservices and Onion Architecture. He's a co-founder of Noordwind, does public speeches and coaches developers via workshops and online courses.

He worked in a variety of companies, both on-site and remotely for customers from Poland, UK, Belgium or Germany. After hours he develops side projects and is an active open source contributor. He runs a blog and his profile can be found on GitHub, Twitter, Hacker News, Reddit or YouTube. In a spare time he enjoys lifting weights, running and motorcycling.

Łukasz Pyrzyk

https://pyrzyk.net
https://www.linkedin.com/in/lukaszpyrzyk/
lukasz.pyrzyk@gmail.com

Summary

Łukasz is a software developer with nearly five years of work experience in large corporations such as Volvo, Credit Suisse and Ryanair. He has extensive knowledge of building efficient and scalable back-end applications using .NET Framework. As part of his skills development, he often participates in solving algorithmic puzzles and programming meetings. In his career he has over twenty appearances as a speaker at various conferences and meetups. Łukasz has built a distributed caching system using .NET Core and Docker for his engineer thesis. In free time he writes a blog at https://pyrzyk.net, walks in the mountains and cycles.

Offering

- .NET Core workshops - from beginner to advanced level.
- Migrating existing .NET projects to .NET Core.
- .NET Core application deployment with Windows or Linux servers.
- CI & CD for .NET Core applications with Docker, Build server, Nginx/IIS, Rancher.
- Architecting solutions for backend applications and system services.
- Low-level debugging, profiling and optimization.

.NET Core Tour

https://pyrzyk.net/tour/
http://piotrgankiewicz.com/2017/03/20/net-core-tour/

.NET Core Tour is series of meetups and workshop focused on the latest version of .NET platform. .NET Core is an open source and cross platform implementation of .NET framework focused on the performance and based on .NET Standard.

During the tour we gave the public speeches, demos of the newest functionalities and experimental types, as well as presented how .NET Core can be used in enterprise solutions including building, testing and deploying the application.

- Over 20 meetings in the biggest Polish cities with record attendance.
- Open workshops for programmers interested in .NET Core.
- Interview at Microsoft HQ - live stream on Channel9.
- MSDN Meetup of the week and multiple mentions in social media around the world.
- Official partnership with Microsoft, JetBrains, Digital Ocean and other companies.
- Over thousand participants and very high ratings (on average 4,74/5).
- Multiple open source projects created for the demo purposes.
- Technical stack based on the hottest technologies like Docker, Linux, Visual Studio, Nginx, Rancher and several cloud providers like Azure or Digital Ocean.
